	Examiner Maryam Monshipouri	Art Unit 1652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's response to restriction requirement filed 10/07/2004 is acknowledged. Applicant elected Group II invention (claims 3 and 12) without traverse. Claims 1-2, 4-11, 13-23 are canceled. Claims 3, 12, 24-43 are currently pending.

It is noted that currently pending claims 12, 24-30 continue to be directed to a method of detecting the presence of polypeptide utilizing an agent that binds said polypeptides, which are not merely antibodies. Considering the fact that applicant has not mended the method claims to utilization of antibodies, it is assumed that said agents are activators, agonists or antagonists, which are all structurally and functionally different than antibodies. Therefore, upon further review of the previous office action further restriction deemed necessary as following:

Group II: claims 3, 31-43, drawn to antibodies which specifically bind said polypeptides.

Group IX: claims 12, 24-30 are directed to methods of detecting polypeptides using any agent that binds said polypeptides, classification not possible. This because classification depends on the structure of the agent and applicant as not defined the structure of said agent.

The inventions of Group II and IX are patentably distinct because the product of Group II is neither made nor used by the method of Group IX.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
